Doan Nguyen Quoc Huy

Software Engineer — Frontend (React / Next.js)

0911 986 933 · doannguyenquochuy13@gmail.com · linkedin.com/in/huy-doan13 · Go Vap, Ho Chi Minh City

SUMMARY

Frontend-focused Software Engineer with ~3 years of production experience in React, Next.js and TypeScript. Founding developer of **Pebbles**, a Singapore-held early childhood services platform that launched in Ho Chi Minh City with **40+ provider storefronts**. Built Shopify stores that generated **HK$116K+ in their first 3 months** and helped win a client contract through pre-sales consulting. Focused on high-performance, scalable frontends and clean, maintainable code; uses AI tools (Cursor, Claude Code) daily to ship faster across the stack.

WORK EXPERIENCE

Eastplayers

09/2024 – Present

Software Engineer

Pebbles — Early Childhood & Family Services Platform app.pebbles.vn ↗ 10/2025 – Present

Singapore-held platform, launched first in Ho Chi Minh City: parents book trusted child and family services and track their child's development. User app, provider portal, admin.

Role: Founding developer | **Team:** 2 devs + 1 lead at kickoff, grew to 4 devs, 1 BA, 2 QC

Tech: Next.js 15/16, React 19, TypeScript, TanStack Query, Zustand, MUI, Socket.io, NestJS, PostgreSQL, Redis

- **Founding engineer, concept to launch in ~12 months**: one of 2 developers who built Pebbles from the first commit to a production launch with **40+ provider storefronts live on day one**.
- **Owned features end to end across 4 codebases**, shipping each one from the API to the user app, provider portal and admin, which cut hand-offs on a small team.
- **Turned complex booking rules into one reliable flow**: opening hours, notice periods, capacity limits, packages, walk-ins and cancellations, so providers run online and offline customers in one system.
- **Built the growth and retention levers the business launched with**: sign-up-free Explore with campaign deeplinks, trial mode, child milestone tracking, daily missions and GA4 funnel tracking.
- **Protected platform revenue** with real-time chat that shows live booking status and warns users who share contact details, keeping deals on Pebbles.
- **Partnered with the BA, QC and client** to turn requirements into user flows and close UAT feedback through the Phase 1 launch.

Shopify E-commerce — Nice Care, Insane Clo, Cedora 04/2025 – 10/2026

Custom storefronts for 3 brands in Hong Kong, Vietnam and Australia.

Role: Lead developer on all 3 stores (sole developer on Nice Care and Cedora) & pre-sales consultant | **Tech:** Shopify Liquid, JavaScript, CSS, metafields

- **Nice Care (HK): HK$116K+ in sales, 168 orders and a 30% returning-customer rate** in the first 3 months after launch.
- **Insane Clo (VN): helped win the contract** for this well-known local fashion brand, then led development of the store from Shopify's Horizon theme.
- **Cedora (AU): sole developer across a 10-month engagement**, owning every storefront change the furniture brand needed, so its team could run promotions and seasonal sales **without an in-house developer**.
- **Editable theme sections** let client teams launch campaigns and banners themselves, **with no developer in the loop**.

CXGenie — AI Customer Support Platform (SaaS) 10/2024 – 09/2025

Omnichannel inbox where businesses run AI chatbots and human agents. Scrum team of 25, monthly releases.

Role: Frontend Developer | **Tech:** Next.js 14, React 18, TypeScript, Vite, TanStack Query, Recoil, Zustand, Socket.io, LaunchDarkly

- **Opened Telegram as a new support channel**: agents handle Telegram group conversations in the same real-time inbox.
- **Built the Support Center product from scratch**, a self-service help center that lets clients deflect repetitive tickets.
- **Added voice as a new way for customers to reach support**: built voice messaging end to end in the chat widget and web chat (recording UI, playback, sending), including iOS Safari support.

EbizWorld Software

01/2024 – 08/2024

Front-End Developer

- Built responsive web interfaces with React and TypeScript from Figma designs.
- Created reusable components with Tailwind CSS, Ant Design and Material UI to speed up development.
- Integrated REST APIs and managed application state with Redux Toolkit.

FPT Software

01/2022 – 05/2022

Front-End Developer Intern

- Fixed bugs and improved UI with React on company projects.

SKILLS

Frontend	TypeScript, JavaScript (ES6+), React 19, Next.js 15/16, Tailwind CSS, SCSS, MUI, Ant Design
State & Data	TanStack Query, Zustand, Recoil, Redux Toolkit, REST, Socket.io
Backend	NestJS, PostgreSQL, Sequelize, Redis
E-commerce	Shopify Liquid, Shopify CLI, theme sections & metafields
Tools	Git, Figma, GA4, LaunchDarkly, OneSignal, i18next, Mapbox, Cursor, Claude Code
Languages	Vietnamese (native), English (intermediate, IELTS 6.5 equivalent)

EDUCATION

FPT University

05/2020 – 11/2023

Bachelor of Information Technology, Software Engineering

UOW Malaysia KDU University College

02/2020 – 03/2020

English Enhancement Programme · GPA 7.4 (IELTS 6.5 equivalent)
